

ValueObject

```
classDiagram
    class ValueObject
    class PurchasableReceipt {
        + itemSeq
        + price
        + currency
        + paymentSeq
        + purchaseToken
    }
    ValueObject <|-- PurchasableReceipt
```

The diagram illustrates a class hierarchy. At the top is the 'ValueObject' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'ValueObject', while the two lower compartments are empty. Below 'ValueObject' is the 'PurchasableReceipt' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'PurchasableReceipt'. The middle compartment lists five attributes, each preceded by a plus sign: '+ itemSeq', '+ price', '+ currency', '+ paymentSeq', and '+ purchaseToken'. The bottom compartment is empty. A blue arrow with a hollow triangular head points from the top of the 'PurchasableReceipt' class to the bottom of the 'ValueObject' class, indicating that 'PurchasableReceipt' inherits from 'ValueObject'.

PurchasableReceipt

+ itemSeq
+ price
+ currency
+ paymentSeq
+ purchaseToken
