

com.toast.android.gamebase.auth.data.  
BanInfo.from

com.toast.android.gamebase.auth.transfer.data.  
TransferAccountFailInfo.from

com.toast.android.gamebase.error.data.  
UpdateInfo.from

getStringExtra

```
graph LR; A[com.toast.android.gamebase.auth.data.BanInfo.from] --> D[getStringExtra]; B[com.toast.android.gamebase.auth.transfer.data.TransferAccountFailInfo.from] --> D; C[com.toast.android.gamebase.error.data.UpdateInfo.from] --> D;
```

The diagram illustrates three data classes on the left, each with a blue arrow pointing to a common method named 'getStringExtra' on the right. The classes are: 'com.toast.android.gamebase.auth.data.BanInfo.from', 'com.toast.android.gamebase.auth.transfer.data.TransferAccountFailInfo.from', and 'com.toast.android.gamebase.error.data.UpdateInfo.from'. The 'getStringExtra' method is represented by a grey box with a black border.
