

from

```
graph LR; A[from] --> B["com.toast.android.gamebase.base.ValueObject.fromJson"]
```

The diagram consists of a small gray rectangular box on the left containing the word 'from'. A blue arrow points from the right side of this box to a larger white rectangular box on the right. This larger box contains the package path 'com.toast.android.gamebase.base.' followed by the method name 'ValueObject.fromJson' on a new line.

com.toast.android.gamebase.base.
ValueObject.fromJson
