

getTypeName

com.toast.android.gamebase.
GamebaseSystemInfo.getNetworkName

```
graph LR; A[com.toast.android.gamebase.  
GamebaseSystemInfo.getNetworkName] --> B[getTypeName]
```

A diagram showing a call to the `getTypeName` method. A blue arrow points from the `GamebaseSystemInfo.getNetworkName` property access in the code on the right to the `getTypeName` method name in the box on the left.
